Splendid Hedge Plants

Sturdy, well-grown plants which have been well cultivated; they have good roots. We can supply both California and Amoor River Privet in these sizes and at these prices:

3 to 4 ft., \$10 per 100, \$65 per 1000; 2 to 3 ft., \$7 per 100, \$50 per 1000; 1½ to 2 ft., \$5 per 100, \$35 per 1000. Privet is the best plant for hedges and screens.

PLEASE ORDER THIS WAY

All orders should be accompanied by money order or check; our terms are cash. If we were to extend credit, the prices of our trees would necessarily be higher.

Transportation charges are borne by customer. Tell us whether goods are to be sent by express or freight.

If less than 100 trees of a kind are required, add 5 cents per tree to the price quoted.

We have stocks of other varieties than those mentioned, but not in great enough quantities to list them here. If you do not see what you wish, write to us and ask whether we can supply it.

Order now; shipment will be made to you at proper time for planting.

CHATTANOOGA NURSERIES, Chattanooga, Tennessee

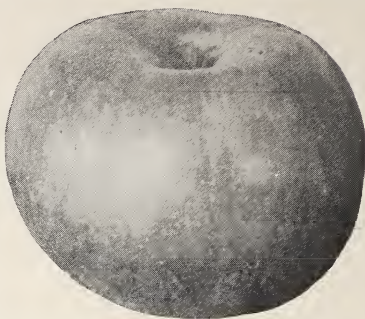

Apple Trees for Orchard Planting

You can plant any one of these varieties and be certain of a market for your fruit. They have proved themselves superior to the older sorts, and have been long enough established to demonstrate that their good qualities will bring higher prices, because of the better flavor and superior keeping qualities.

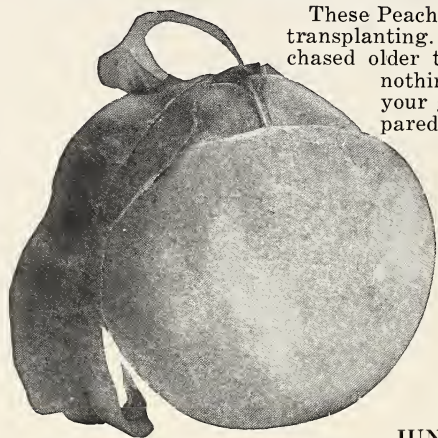

These are all "one-year" trees; that is, they have grown in our nursery one year since being budded. Because of the wide spaces between the rows, and the liberal cultivation the trees have received, they are considerably larger and stronger than trees which are crowded at this critical stage. You may order them with perfect confidence. We advise early orders. Our prices are attractively low for trees of this quality, and it would not be surprising if some varieties were entirely sold.

We can supply **Early Harvest, Yellow Transparent, Red June, Stayman Winesap, Delicious, Black Ben Davis, Winesap, Yates, Horse, York Imperial, Rome Beauty, Grimes' Golden, and Jonathan.** Prices as follows:

4 to 5 ft., \$30 per 100, \$250 per 1000; 3 to 4 ft., \$25 per 100, \$200 per 1000; 2 to 3 ft., \$18 per 100, \$135 per 1000. It's wise to order early at these prices.

Save Money by Planting June Buds

These Peach Trees were budded last June, and are ready for transplanting. You get them much cheaper than if you purchased older trees, yet what is the difference? Merely age, nothing else; these trees will grow just as well on your ground as in the nursery. If you have not prepared the ground for your orchard, it will pay you to buy these trees and set them in rows. You can plant in fall or in spring, just as you wish, and you'll have trees at less than half the price you'd otherwise have to pay.

Remember, if you order less than 10 of a kind, the price is 5 cents more than the rates here quoted. Cost of packing is borne by us. Note these low prices and send your order at once; we have large stocks of these trees, but it may be that others will order just what you intend to get, so don't delay.

Varieties: **Elberta, Early Rose, Carman, Hiley, Early Belle of Georgia, etc.**

JUNE BUDS

3 to 4 feet, \$18 per 100; \$140 per 1,000. 2 to 3 feet, \$14 per 100. \$115 per 1000. 18 to 24 inches, \$10 per 100, \$90 per 1000; 12 to 18 inches, \$8 per 100, \$75 per 1000.

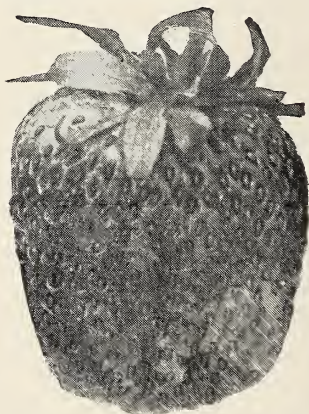

Have Strawberries Next Year

Plants set out now will produce a light crop of fruit next year, and a heavy crop the following year. Your berry plants will be just as healthy and strong as if you waited another season, and you will get fruit sooner.

Here Are Varieties That Have Proved Their Merits

We have long made a specialty of the two sorts which we consider superior for commercial growers. Klondike and Aroma keep firm a long time, and they are excellent in flavor and large in size. If you have never tried them, you should plant an acre this fall. If you have tried them, you need no description of their good qualities, as you have no doubt discovered what excellent profit-makers both of them are.

We can supply plants of either Klondike or Aroma for \$3.50 per 1,000, and at even lower rates for greater quantities. All these plants are healthy and well developed; growers who deal in small orders have to charge much more than our price.
